Dear Colleague,

In the past year, there have been a staggering number of critically important updates that need to be understood and incorporated into the practice of general internal medicine to ensure optimal patient care and outcomes.

The 42nd Annual Intensive Review of Internal Medicine (IRIM) synthesizes this vast amount of information and presents it with efficiency and effectiveness to ensure that you are current with these updates and the best ways to incorporate them into practice.

For those of you who are preparing to certify or recertify, we complement this education with extensive board examination preparation and test-taking skills.

IRIM is one of the most comprehensive reviews offered by the clinical faculty of the Harvard Medical School. You can participate in over 120 clinical updates, case discussions, and board preparation sessions and practice runs.

In the course of a week, you get an accelerated, impactful and inspiring learning experience. Sessions and board preparation span all major fields of internal medicine and are led by Harvard Medical School’s most distinguished clinical faculty in each field.

Year after year, attendees report the experience to be “game changing” — invaluable to their clinical practice and exam preparation efforts.

We draw a national and international audience of clinicians and trainees. My co-directors and I hope you will join us for this rewarding educational experience.

WHO ATTENDS

CLINICIANS seeking a practical and comprehensive review that ensures they are up to date across all major fields of internal medicine, including:

- Newer options for diagnosis: what to choose, when, and why
- Treatment and care management strategies to optimize patient outcomes
- How to avoid medical mistakes
- Improved approaches to common and complex clinical challenges
- Navigating screening controversies

PHYSICIANS who are preparing to certify or recertify and are seeking a thorough, proven preparatory course in advance of their taking the ABIM board exam. Preparation includes:

- Daily board review questions
- Sessions to guide efficient preparation and study
- Exam practice sessions with an audience response system that provides immediate feedback
- 2,000-page printed syllabus and home study guide
- Test-taking strategies and skills development

Board Review
In addition to board preparation that is embedded in program lectures, you can reinforce your knowledge with summary Board Review sessions, engage in Board-relevant Q&A with our distinguished faculty, and join in four Exam Practice Sessions.
The Intensive Review of Internal Medicine course enhances internal medicine knowledge by offering a comprehensive update in internal medicine and its subspecialties. It consists of a case-based review of challenging clinical problems and review of literature to guide evidence-based practice. This course can also serve to prepare attendees for the ABIM Board Examinations (Certification/Recertification) and offers daily board review question-and-answer practice sessions in each subspecialty, as well as a special session on maintenance of certification/practice exam. The program also offers daily case-based lectures and meet-the-faculty luncheons covering the most important topics in internal medicine. Throughout the course, emphasis will be placed on the practical application of physiological principles to the understanding and management of clinical problems and board exam preparation.

Learning Objectives
Upon completion of this activity, participants will be able to:

• Apply current/recommended guidelines in clinical practice
• Perform differential diagnosis of complex clinical presentations
• Identify/integrate current therapeutic options for specific disorders, including end-of-life care
• Review and interpret up-to-date literature relevant to clinical practice
• Describe pathophysiology as it applies to management of clinical problems
• Apply knowledge gained to the ABIM certification/recertification examinations

Registration, Payment, Confirmation and Refund Policy
Registrations for Harvard Medical School CME programs are made via our secure online registration system. To register for this course, please visit the course website at IRIM.HMSCME.com.

At the end of the registration process, a $10 non-refundable processing fee will be added to your registration, and you will have the choice of paying by check, credit card (Visa, MasterCard, or American Express), or wire transfer in USD. If you are paying by check (draft on a United States bank) or by wire transfer, the online registration system will provide you with instructions for remitting your course fees. Postal, telephone, fax, and cash-payment registrations are not accepted. All fees shown in USD.

Upon receipt of your paid registration, an email confirmation will be sent to you. Be sure to include an email address that you check frequently. Your email address is used for critical information, including registration confirmation, evaluation, and certificate.
